

# Certificate Course in Data Analytics and Visualization

Offered by  
Marian College Kuttikkanam (Autonomous) PG Department of Computer Applications

## Learning Outcomes

On successful completion of this course, you will be able to

- Understand the importance of data in data analysis.
- Transform data sources.
- Create Dashboards.
- Build visualizations.
- Share insights.
- Analyze Data
- Summarize data and create various summarized graphs using pivot tables and pivot charts.
- Work with Excel, Tableau and Power BI.

### Why Data Science?

There is an increasing need for intelligent and accurate decision-making across industries. This has led to an exponential growth in the adoption of data science technologies, and they are expected to remain relevant in years to come.

### Key Features

- Training on live Datasets.
- Placement Assistance.
- Webinars by experts from Industry.
- Industry collaborated training.

## Who can apply?

- Beginners looking to kick start their career.
- Students looking to boost their career.
- People looking for a career transition into the Analytics Industry.

## TOOLS COVERED

Excel

 Power BI
